ABOUT ME

I am a fresh graduate of the Informatics Engineering Study Program at Mikroskil University. Now, I am working as a Laboratory Assistant at Mikroskil University while working on several fullstack mini projects using MERN technology. I have a deep interest in Web Development, Game Development and Mobile Development. In addition, I also have the ability to work collaboratively in a team to achieve a common goal.

EXPERIENCE

Computer Lab Assistant

Sep 2024 - Present

- Assisting students in practical implementation of backend development using JavaScript and MySQL
- Guiding students in designing and managing REST APIs and relational databases
- Supporting students in developing mobile frontend interfaces using Flutter
- Explaining Flutter UI components such as widgets, layouts, and navigation
- Helping students troubleshoot frontend code and integrate with backend APIs
- Reviewing students' practical assignments related to backend and mobile frontend
- Supervising practical exams and ensuring smooth session flow

Capstone Project Game 2D with Unity

Mar 2024 - jun 2024

- Create 3C (Character, Control, Camera) with Unity and C#
