## ABOUT ME

I am a fresh graduate of the Informatics Engineering Study Program at Mikroskil University. Now, I am working as a Laboratory Assistant at Mikroskil University while working on several fullstack mini projects using MERN technology. I have a deep interest in Web Development, Game Development and Mobile Development. In addition, I also have the ability to work collaboratively in a team to achieve a common goal.

---

## EXPERIENCE

### Computer Lab Assistant

Sep 2024 - Present

- Assisting students in practical implementation of backend development using JavaScript and MySQL
- Guiding students in designing and managing REST APIs and relational databases
- Supporting students in developing mobile frontend interfaces using Flutter
- Explaining Flutter UI components such as widgets, layouts, and navigation
- Helping students troubleshoot frontend code and integrate with backend APIs
- Reviewing students' practical assignments related to backend and mobile frontend
- Supervising practical exams and ensuring smooth session flow

---

## PROJECT

### Image Gallery Web App

Jul 2022 - Jul 2022

*Project UAS | HTML, CSS, JavaScript*

- Image gallery with search and category features
- Responsive design using HTML and CSS
- Interactivity with JavaScript (search, filters, dynamic rendering)
- Improve understanding of DOM manipulation and event handling

### Fullstack E-Commerce Checkout System

Jan 2023 - Jan 2023

*React, CSS, Node.js, Express, MongoDB*

- Fullstack e-commerce application with shopping cart feature
- User can select, delete one or all items in the cart
- Checkout page with validation of item checklist before purchase
- Order system saves transaction data to MongoDB
- Responsive and interactive UI using React

### Mobile Front-end With Flutter

Apr 2023 - Jul 2023

*Front-end Mobile Application Development Course Project (UAS)*

- Create a Perbaungan school application design using figma
- Create features for students starting from the login page, main menu page, profile, school hours, assignment menu, tuition menu, report card menu, school news.

### TabungPintar – Personal Finance Web App

April 2025 - April 2025

*Fullstack MERN | MongoDB, Express, React, Node.js*

- Personal finance app with features: Income, Expenses, and Account Management
- Users can create accounts, record income & expenses by account
- Data is displayed in summary format to monitor financial condition
- Backend REST API with Express & MongoDB, responsive frontend using React

---

## EDUCATION

Okt 2021 - Feb 2025

University of Mikroskil

GPA : 3.79 / 4.00

---
