ABOUT ME

I am a recent graduate with a Bachelor's degree (S.Kom) in Informatics Engineering from Mikroskil University. Currently, I am working as a Laboratory Assistant while developing fullstack projects using the MERN stack. During 3 years of practical experience during my studies, although I have no formal professional experience, I have honed my web and mobile development skills through real projects, self-learning, and collaboration. I am eager to contribute and passionate about Web, Game, and Mobile Development, thriving in a dynamic team environment.

WORK EXPERIENCE

Computer Lab Assistant - Mikroskil University

Sep 2024 - Present

- Assisting students in practical implementation of backend development using JavaScript and MySQL
- Guiding students in designing and managing REST APIs and relational databases
- Supporting students in developing mobile frontend interfaces using Flutter
- Explaining Flutter UI components such as widgets, layouts, and navigation
- Helping students troubleshoot frontend code and integrate with backend APIs
- Reviewing students' practical assignments related to backend and mobile frontend
- Supervising practical exams and ensuring smooth session flow
